## Seine River Levels & Flows Flood Watch

(Posted Monday, May 17, 2023)

H2O Power advises all users to appropriate care, caution and to re-consider use of activities along the Seine River. Lake/River levels and flows are rising and may continue to rise rapidly. Minor flooding in low-lying areas is possible. Users are advised to stay clear of fast-flowing rivers and potentially unstable riverbanks during the high-streamflow period. H2O Power continues to monitor conditions closely.

For further information, please check the Seine River Water Management Plan website at [www.seineriverwmp.com](http://www.seineriverwmp.com) or [www.h2opower.com](http://www.h2opower.com).

The infographic is a two-column layout. The left column has a red background and is titled 'FLOOD WARNING'. It contains text explaining that a Flood Warning is issued when flooding is happening or will happen soon, and that some roads will be flooded. It advises users to 'Move to higher ground' and 'Never drive through flooded roads', and concludes with the instruction 'Take action'. The right column has a teal background and is titled 'FLOOD WATCH'. It explains that a Flood Watch is issued when flooding is possible. It advises users to 'Stay tuned to radio/TV, follow https://www.ontario.ca/page/floods https://www.h2opower.com/water-management/' and to 'be ready to seek higher ground', concluding with the instruction 'Be prepared'. Both columns feature background images of water and industrial structures.

FLOOD WARNING	FLOOD WATCH
A Flood Warning is issued when flooding is happening or will happen soon. Some roads will be flooded.	A Flood Watch is issued when flooding is possible.
Move to higher ground.	Stay tuned to radio/TV, follow <a href="https://www.ontario.ca/page/floods">https://www.ontario.ca/page/floods</a>
Never drive through flooded roads	<a href="https://www.h2opower.com/water-management/">https://www.h2opower.com/water-management/</a>
Take action	and be ready to seek higher ground
	Be prepared
